

Visibility, Cropping, and Over Flow

Styling	Property	Values	Comments
Visibility	visibility	visible hidden inherit	<p>Element should have its position property defined before setting this property</p> <p>Unlike display:none, a hidden item still takes up space</p> <p>Inherit: receives its visibility from its parent</p>
Cropping	clip	rect (top_value right_value bottom_value left_value)	<p>limits item's display to the clipped area</p> <p>space-separated list of values such as pixel amounts.</p> <p>Note: The clip property does not work if the overflow property is set to visible.</p>
Over Flow Control	overflow	scroll hidden visible inherit auto	visible value overrides clip property
